

Sloan Publishes Inaugural ESG Report

Report highlights key objectives, demonstrates continued commitment to sustainability

FRANKLIN PARK, IL (November 2, 2023) – [Sloan](#), the world’s leading manufacturer of commercial plumbing systems, has published its [Environmental, Social, and Governance \(ESG\) report](#). The report highlights Sloan’s sustainability achievements and demonstrates its continued commitment to sustainability objectives.

The report covers a variety of sustainability-related topics, including:

- Environmental Overview
- Energy & Emissions
- Water
- Waste
- Health & Safety
- People
- Communities
- Governance & Ethics

“At Sloan, we understand that our customers are seeking suppliers who can help them achieve their sustainability targets and published goals,” said Dr. Paul Sambanis, Sloan Vice President, Sustainability. “Our inaugural ESG report is an important milestone in our over 115-year history as we further strengthen our commitment to sustainability and broader ESG issues, including greenhouse gas emissions, water conservation, employee wellbeing, and more.”

Sloan has dedicated over a century to pioneering smart, water-saving restroom solutions that last a lifetime and contribute to more sustainable water use. The U.S. Environmental Protection Agency (EPA) presented Sloan with a 2022 WaterSense Excellence Award, recognizing its extensive offerings of WaterSense-labeled flushometers, toilets, urinals, commercial showerheads, and faucets that use at least 20 percent less water, save energy, and perform better than or as well as regular models. In 2022, Sloan was among the first companies to sign on to The Water Council’s WAVE program, an initiative designed to help companies improve, report, and verify their water stewardship.

In addition, the report details Sloan’s continued efforts to minimize the impact of waste generated by its operations. For over a decade, Sloan has promoted cradle-to-cradle production principles that encompass all stages of its product processes, from materials sourcing and manufacturing to disposal.

The report also includes insights on Sloan’s proactive approach to energy and emissions. From establishing and aligning to a science-based greenhouse gas reduction target to transitioning to renewable energy, Sloan is dedicated to improving energy efficiency and reducing overall energy consumption for its products and operations.

Sloan's various community outreach initiatives are featured in the report, including its Mobile Restrooms – deluxe facilities around the U.S. to help support communities affected by natural disasters, emergencies, and other catastrophic incidents like the COVID-19 pandemic. Sloan is also helping to build communities worldwide through collaborations with Shiloh Homes of Hope, the Anthony Rizzo Foundation, The Maestro Cares Foundation, and many more.
