

Sloan Digital Resources Help Fast-Track Restroom Fixture Specification

MasterSpec, BIMs, and Sloan DesignSpec Accelerate Specification Process

FRANKLIN PARK, IL (November 4, 2024) – [Sloan](#), the world’s leading manufacturer of commercial plumbing systems, offers a suite of digital resources designed to simplify the specification process for designing or renovating commercial restrooms. With MasterSpec, Building Information Modeling (BIM) files, and Sloan DesignSpec, specifiers can save time while ensuring precision.

“Specification is a crucial part of developing a sustainable, aesthetic, and hygiene-friendly restroom, but with so many products available today, it can be a burdensome task,” said Tim Schiffbauer, Sloan Director of Channel Marketing. “With Sloan’s suite of digital specification tools, we’re helping to trim that process from hours down to minutes.”

Sloan’s collection of digital specification tools include:

- [Sloan MasterSpec](#): This comprehensive resource provides recommended specification language based on product offering, vertical market, and Sloan product collections. MasterSpec specifications are completely written out and formatted in Microsoft Word, so all that is required is to select the specific products – eliminating the need to re-type, reformat, or verify every detail.
- [BIMs](#): Sloan’s BIM allows specifiers to share and manage project data within an intelligent and dynamic 3D model. These BIM files enable easier collaboration between all parties on a project, giving them realistic visualizations, robust metadata, and small file sizes in order to create a more streamlined process, reduce any design errors, and assist in analyzing a building’s potential environmental impacts
- [Sloan DesignSpec](#): DesignSpec empowers users to create a polished presentation that showcases design vision after the MasterSpec and BIM process is complete. This online resource helps building professionals create a finished specification through a simple and efficient process.

These innovative resources from Sloan not only streamline workflows but also enable industry professionals to dedicate more time to creativity and design, helping drive excellence in commercial restroom projects.
