

## **Sloan Unveils FLITE-DEC™ Integrated Sink System**

*New sinks integrate soap dispenser, faucet, hand dryer, and basin into one robust unit*

FRANKLIN PARK, IL (October 30, 2025) – [Sloan](#), the world’s leading manufacturer of commercial plumbing systems, has launched its new FLITE-DEC Integrated Sink System. FLITE-DEC Sinks combine sleek design, cutting-edge technology, and user-friendly features to meet the demands of modern, high-traffic restroom environments.

“Sloan’s FLITE-DEC Integrated Sink System represents a significant step forward in restroom innovation,” said Emerson Vogel, Sloan Product Line Manager, Sink Systems. “Its eco-friendly design, combined with advanced technology, redefines operational efficiency by reducing maintenance efforts and cutting energy and water consumption, resulting in a cleaner, drier, and more hygienic handwashing experience.”

Designed with aesthetics and durability in mind, the FLITE-DEC integrates soap dispenser, faucet, hand dryer, and basin into one streamlined unit. The basin-mounted components are engineered to withstand the rigors of constant use, and the system can be configured for either chase or front access for maintenance efficiency.

Sloan re-engineered the FLITE-DEC basin-mounted fixtures to withstand up to 150 pounds of downward force to endure vandalism and heavy use common in public spaces. As a high-use fixture, design flexibility was also a key consideration. The sinks are customizable to accommodate renovations as well as new construction.

Customization options include:

- 100+ colors
- Multiple material types
- Customizable dimensions
- LED lighting
- Straight, beveled, or rounded edges
- Accessories such as trash holes, baby changing stations, bag hooks, and more

The IAPMO-certified FLITE-DEC Integrated Sink System sets a new standard for efficiency in restroom management. With a top-fill closed soap system and 2.8-gallon reservoir capable of supporting up to 10,600 touchless hand washes per fill, the system ensures hygiene alongside operational efficiency. In addition, the reduced sink deck surface with basin-mounted fixture further minimizes water pooling, resulting in cleaner, drier, and healthier restroom spaces for industries such as transportation, entertainment, hospitality, and more.
